INVENTOR
OF THE
AMERICAN
MULTI-TOOL

When Tim Leatherman founded Leatherman Tool Group, Inc. in 1983, he set out to create products to improve people's lives. He also knew he wanted to create jobs for hard-working Americans who shared his passion for *great design* and *best-in-class manufacturing*. After 30 years and more than 70 million tools, we're proud to say our one and only manufacturing facility is still *right here in Portland, Oregon, employing more than 600 people*. We're just as proud to say, in all this time, we've never wavered from Tim's traditions of application-driven design, superior materials and detailed finish work. For 30 years we've supported people with products that prepare them for the expected and the unexpected and our community with jobs and growth.

Leatherman. Leave nothing undone.

POCKET TOOLS

"I had faith I could sell the tool to some company, but on the off chance that I didn't I knew I'd have to go into business, and I knew nothing about business. I had no idea what an invoice or accounts receivable were, and I didn't have any sales skills. So I took a sales job I found in the want ads. By day I sold welding products and when I called on machine shop accounts, I'd bring my prototypes so I could learn more about manufacturing."

MULTI-TOOLS

"I brought my prototype to the knife companies. They looked it over and said, 'This isn't a knife, it's a tool.

We're not in the tool business.

'All the major knife companies said no. Eventually I got the message, and decided that if it's not a knife, it's a tool. I visited several tool companies and they all said, 'This isn't a tool, it's a gadget. Gadgets don't sell.'"

KNIVES

"Back when Steve [Berliner] and I were brainstorming company names, I told him we didn't need to name it after me.

But he insisted, and I think he was pretty wise in doing so. Since my name is on every tool we make, I still feel a responsibility for the quality of each one we sell."
